RCN-SEES: Predictive Modeling Network for Sustainable Human-Building Ecosystems (SHBE)

Call for Abstracts for Workshop on Theme III: Social/Policy Impacts Thursday, May 19 – Friday, May 20, 2016 Florida State University, Tallahassee FL

Abstract Submission Deadline: ~~Tuesday, April 5~~ *has been extended to Friday, April 15*
Hotel and Advance Registration: Monday, April 18

This NSF-funded Research Coordination Network (RCN) in Science, Engineering and Education for Sustainability (SEES) announces its fifth workshop on one of its five themes: **Social/Policy Modeling**. Invited participants are requested to submit an abstract of about 500 words for engaging discussions and presentations relating to, but not limited to:

- The role of human decision making and mechanism design in improving policies.
- How public policies, practices and social forces influence energy efficiency and sustainability of human-building ecosystems
- Links between policies, technology, design, and building performance
- Data and models to understand adoptions and diffusion and implementation of policy social and technical innovations across scale
- Models of social policy and regulatory barriers to energy efficiency and sustainability
- Insights from government and practice for energy efficiency and sustainability

About Theme III: Social Policy/Impact Modeling

The theme focuses on understanding diffusion of design, technology, and behavioral innovations related to building ecosystems and policy impacts on the evolution of human-building ecosystems and the impacts of social forces policy and program implementation on building energy performance at multiple scales.
